

TITAN

Metal Powders

a division of Titan International, Inc.

Specialty Materials and Custom Alloys

- Ferro-Vanadium 80%
- Ferro-Molybdenum
- Ferro-Niobium 67%
- Ferro-Phosphorus
- Ferro-Tungsten
- Ferro-Boron
- Ferro-Titanium-Silicon-Boron
- Aluminum Powder

- Nickel-Niobium
- Tungsten-Nickel-Iron (Densalloy)
- Tungsten Carbide Powders
- Rare Earth Metals and Mischmetal

Pure Metals:

- Tungsten
- Nickel
- Rhenium
- Molybdenum
- Niobium
- Chromium
- Tantalum
- Cobalt

Size and properties are custom to your application. Commonly produced sizes include:

- 1/4" x down
- 8 mesh
- 20 mesh
- 50 x 325 mesh
- 60 mesh
- 140 + 325 mesh
- 325 mesh
- 10 micron

Specialty Melt Stocks available in larger sizes.

Custom mesh sizes are available. Lot analysis and certification are available for all materials. Toll processing of proprietary materials is a service that Titan Metal Powders provides.
